Who’s Who in Environmental Law

**Brad Marten is the Managing Partner of Marten Law. He is consistently ranked by his peers as one of the nation’s top environmental lawyers. Brad is Past President of the American College of Environmental Lawyers and a member of the Board of Directors of the Environmental Law Institute. He is on Lawdragon’s list of the 500 Leading Lawyers in America.**

Brad has gained his national reputation by successfully representing clients in nearly every sector of the economy, across the United States for 40 years. These include several of the largest environmental damages cases ever brought in the United States and dozens of other cases and transactions for clients in mining, manufacturing, refining, transportation, food processing, agricultural and financial services industries.

Chambers lists Brad in its top tier, and in its most recent edition has this to say about him:

Brad is “considered by commentators to be ‘a genius in the environmental field.’” He is “better than anyone else in town” ... “enjoys the healthy respect of peers and works well with regulatory authorities.” Clients commented: “He always seems genuinely concerned about our issues and is willing to communicate and explain things.”

**REPRESENTATIVE MATTERS**

- Representing parties in complex Superfund and natural resource damage environmental claims and litigation throughout the United States. These include dozens of federal and state Superfund sites in negotiation with EPA and the Justice Department, Natural Resource Trustees, state agencies, and Indian Tribes. Brad has successfully served as lead or common counsel at Superfund sites in over 15 states, in matters involving more than one hundred parties, and damages over \$1 billion.
- Defending permitting and enforcement actions brought against public and private companies in the retail, manufacturing, mining, food, waste and service sectors before state and federal agencies, including the United States EPA, Department of the Interior, and NOAA.
- Representing the principal contractor at a nuclear waste cleanup facility.
- Representing developers in addressing environmental concerns at projects involving over 40 million square feet of office space, as well as residential developments, commercial areas, transit facilities, golf courses, and timberlands.
- Advising clients on emerging issues relating to climate change law and regulation, including reporting requirements, SEC disclosure, permitting under the Clean Air Act, and litigation.
- Conducting environmental due diligence for dozens of companies in the manufacturing, real estate, food processing, and solid waste industries.
