

MARTEN LAW

Marten Law is one of the largest environmental law firms in the country. It has built a national reputation as a leader in environmental and energy law. We represent clients throughout the country in complex environmental, energy, and natural resources matters. We focus solely on these practice areas so we can provide better service and advice to our clients on issues ranging from alternative energy, climate change and air quality to hazardous and solid waste, water resources, water quality, fisheries, environmental review and permitting. Our lawyers handle everything from compliance and transactional work to trial and appellate litigation.

To help us stay at the forefront of our field, all of our lawyers publish articles in our nationally recognized bi-weekly newsletter, which reaches over 35,000 subscribers in all 50 states and in more than 20 countries.

Our summer and first-year associates take on real responsibility in real cases from the day they walk through the door. We hire only exceptionally talented students from top law schools with a demonstrated passion for environmental and energy law. We rely on them and trust them to do excellent work from the start. Through our mentorship of younger lawyers, we ensure that each associate quickly becomes a leader in his or her chosen specialty.

We offer an elite environmental practice right from the start, with a competitive private firm salary.
